**Freelancer** – *Web Developer*

---

## Selected Projects

**LoLe** - Full-stack developer - May 2024 - running

Developed a highly accessible dashboard to streamline the coordination of welfare services. Led a team in developing the application from scratch, delivering a rapid Proof of Concept (PoC) that secured further investment and development by the customer.

#### Technologies

- Typescript + React
- Node+Trpc —Migrated to —> Nest.js
- MongoDB
- Playwright

**Jarvis** - Full-stack developer - Apr 2023 - Running

Took ownership of and re-engineered a web application for lens parameter calculation and certification printing following the departure of the previous team. Single-handedly revitalized the application by rewriting the bug-ridden front-end and resolving critical back-end issues. Improved client communication and collaboration, leading to renewed investment in the application's further development.

#### Technologies

- Angular 15
- C#/Dotnet6
- Azure
- MongoDB

---
